YATZY NUMBER OF DOWNLOADS EXCEEDS EXPECTATIONS IN SWEDEN AND RUSSIA

The big number of players from Sweden and Russia can now play Yatzy in their own native language. Yatzy speeds-up its gameplay with a new 60 seconds timer to heat up online matches between players.

On request from Yatzy players worldwide, Game.IO today unveiled a 60 seconds in-game timer to improve the gameplay experience when Yatzy players compete in online mode. If the player does not make a move in one minute, the turn is transferred to other player, making the online mode faster, more dynamic and exciting.

The constant growth of interest for Yatzy, especially in Sweden and Russia, encouraged Game.IO to provide all players from these two countries a Yatzy version in their own native language.

Coming with new, refreshing and challenging look, the recent launch of Yatzy for Windows Phone devices was widely embraced by Yatzy fans from all over the world. The latest release featured online mode which gave top players the option to gather and create the most exciting Yatzy competitions, including betting mode to exceed expectations and dive into deeper in-game challenges. In-apps for the users of Windows Phone 8 are now added so that the players can get more Game.IO chips and few more options for getting free chips. In addition, for even greater experience, lots of themes are added, so that each user can change the themes the way s/he prefers.
